

- D. By avoiding the use of cloud-based collaboration tools
28. Which of the following is a characteristic of a well-designed MIS report?
- A. Contains excessive technical jargon
 - B. Presents only historical data
 - ☒ C. Offers actionable insights
 - D. Focuses solely on individual tasks
29. In the context of MIS, what does the term "Data Mining" refer to?
- ☒ A. Extracting valuable insights from data
 - B. Deleting outdated data
 - C. Encrypting sensitive information
 - D. Moving data to a new server
30. Ethical issues in information systems only relate to the misuse of personal data.
- A. True
 - ☒ B. False
31. What is the primary concern related to privacy in information systems?
- ☒ A. Unauthorized access to sensitive information
 - B. The use of outdated hardware and software
 - C. Overutilization of cloud-based services
 - D. Inefficient data backup procedures
32. What is the primary purpose of Intellectual Property Rights (IPR)?
- A. To protect the interests of businesses and restrict competition
 - ☒ B. To encourage creativity and innovation by granting exclusive rights to creators and inventors
 - C. To limit the dissemination of knowledge and information
 - D. To provide tax benefits to intellectual property owners

- A. To automate day-to-day operations
 - ☒ B. To assist top-level executives in strategic decision making
 - C. To provide operational data for analysis
 - D. To process transactions quickly
5. Which of the following technologies is used to identify individuals based on physical or behavioral traits for security purposes?
- A. Encryption
 - B. Firewall
 - ☒ C. Biometrics
 - D. VPN
6. What is the purpose of a firewall in an information system?
- A. To detect and remove viruses from the system
 - ☒ B. To restrict unauthorized access to the network
 - C. To store and organize data securely
 - D. To improve the system's processing speed
7. Which of the following is an advantage of using cloud-based MIS solutions?
- A. Increased physical security of data
 - ☒ B. Lower initial setup costs
 - C. Decreased dependence on internet connectivity
 - D. Slower software updates and patches
8. Which component of an MIS is responsible for converting data into meaningful information?
- ☒ A. Software
 - B. Hardware
 - C. Procedures

COURSE CODE: CSC 448
CREDIT HOURS: 3 Credits
SESSION: 2022/2023

LEVEL: 400
TIME ALLOWED: 35 Min.

ID: _____

Program: _____

INSTRUCTIONS: *Answer All Questions on the question paper; Circle the correct answer from the list of options provided*

1. Management information system is _____ human-machine based system.
 - A. an interpreted
 - B. an interstellar
 - ☒ C. an integrated
 - D. an interdependent

2. Which type of information system is responsible for automating routine transactions?
 - A. Decision Support System (DSS)
 - ☒ B. Transaction Processing System (TPS)
 - C. Enterprise Resource Planning (ERP) System
 - D. Management Information System (MIS)

3. What is the main purpose of a Decision Support System (DSS)?
 - A. To automate routine tasks
 - B. To provide real-time operational data
 - ☒ C. To support strategic decision making
 - D. To process transactions efficiently

4. What is the primary purpose of an Executive Support System (ESS)?

☒ (D) Data

9. Which phase of the Systems Development Life Cycle (SDLC) involves gathering and understanding end-user requirements?

☒ (A) Analysis

B. Design

C. Implementation

D. Planning

10. What is the primary goal of business process reengineering (BPR)?

A. To automate all business processes

☒ (B) To eliminate inefficient processes and improve performance

C. To reduce the number of employees in the organization

D. To centralize decision-making authority

11. The Systems Development Life Cycle (SDLC) is a linear, sequential process that does not allow for iteration.

A. True

☒ (B) False

12. Cloud-based MIS solutions are entirely independent of internet connectivity for their functionality.

A. True

☒ (B) False

13. In the context of data security, what does the term "phishing" refer to?

A. A process of encrypting data to protect it from unauthorized access

B. An unauthorized access attempt on a computer system

C. A type of malicious software that steals sensitive information

☒ (D) An attempt to deceive individuals into revealing sensitive information

- A. Decision Support System (DSS)
 - ☒ B. Business Intelligence (BI) System
 - C. Supply Chain Management (SCM) System
 - D. Transaction Processing System (TPS)
24. How can organizations best prepare for a paradigm shift?
- A. Maintain the status quo and avoid change
 - B. Train employees to resist and challenge the shift
 - ☒ C. Embrace a culture of continuous learning and openness to new ideas
 - D. Create a rigid organizational structure to prevent any change
25. A Customer Relationship Management (CRM) system is primarily focused on managing internal employee interactions and workflows.
- A. True
 - ☒ B. False
26. Which of the following business information systems is designed to help managers make non-routine decisions by providing interactive and ad-hoc analysis tools?
- A. Transaction Processing System (TPS)
 - B. Customer Relationship Management (CRM) System
 - ☒ C. Decision Support System (DSS)
 - D. Enterprise Resource Planning (ERP) System
27. How can businesses use information systems to enhance collaboration among employees and teams?
- A. By discouraging the use of communication tools and restricting information sharing
 - ☒ B. By providing centralized platforms for sharing and exchanging information
 - C. By limiting access to data and keeping information siloed

- ☒ B. Technological Change
- C. Cultural Change
- D. Strategic Change

19. What is the primary goal of Business Process Reengineering (BPR)?

- A. Incremental improvements in existing processes
- ☒ B. Radical redesign and optimization of business processes
- C. Implementing automation technologies
- D. Establishing standard operating procedures

20. Which of the following is a characteristic of a Paradigm Shift?

- A minor modification to existing processes
- ☒ B. radical change in beliefs and ways of thinking
- C. temporary adjustment to the organizational structure
- D. quick and easily reversible change in procedures

21. What is the primary benefit of Automation in business processes?

- A. Reduced need for employee training
- B. Elimination of the need for human intervention
- ☒ C. Increased speed and accuracy of tasks
- D. Simplified decision-making processes

22. Which of the following is an example of a resistance to change in an organization?

- A. Employees actively participating in the change process
- B. Employees suggesting improvements to the change initiative
- ☒ C. Employees expressing concerns and doubts about the change
- D. Employees adapting quickly to the change without any challenges

23. Which type of information system helps in analyzing and predicting future trends to support strategic decision-making?

14. Which type of information system helps in managing an organization's interactions with current and potential customers?
- A. Enterprise Resource Planning (ERP) System
 - ☒ B. Customer Relationship Management (CRM) System
 - C. Decision Support System (DSS)
 - D. Supply Chain Management (SCM) System
15. What is the purpose of a data dictionary in the context of database management?
- A. To store sensitive data securely
 - B. To provide a graphical representation of data relationships
 - C. To maintain a record of all data access attempts
 - ☒ D. To describe the data and its attributes in the database
16. Which of the following statements is true about the role of MIS in decision making?
- A. MIS provides only qualitative information for decision making.
 - B. MIS is primarily concerned with strategic decisions and not operational decisions.
 - ☒ C. MIS provides both historical and real-time data for decision making.
 - D. MIS is irrelevant in the decision-making process.
17. Which phase of the Systems Development Life Cycle (SDLC) involves conducting a feasibility study to assess project viability?
- ☒ A. Planning
 - B. Analysis
 - C. Design
 - D. Implementation
18. Which type of organizational change involves introducing a new technology or system to improve efficiency and effectiveness?
- A. Structural Change

33. What does a patent protect in the context of Intellectual Property Rights?

- A. A specific design or appearance of a product
- B. A company's brand name and logo
- ☒ C. An invention or a new and useful process, machine, or composition of matter
- D. The unique combination of features that make a product different from others

34. What is the purpose of a "session cookie"?

- ☐ A To remember user preferences across multiple sessions
- ☐ B To track user behavior for marketing purposes
- ☐ C To store login credentials securely
- ☒ D To maintain user data during a single browsing session

Provide the correct answer to fill in 34-37

35. Which type of Intellectual Property Right protects original works of authorship, such as literary, artistic, and musical creations?.....COPYRIGHT.....

36. Which international agreement aims to protect intellectual property rights globally and provides a framework for member countries to enforce those rights?

TRIPS (Trade-Related Aspect of Intellectual)

37. Which type of Intellectual Property Right protects distinctive signs, symbols, and logos used to identify and distinguish goods and services of one seller from those of others?.....Trade mark.....

GOOD LUCK
